NOTE INTERMINISTERIAL N° 569

Regarding the strengthening of health measures at borders as part of the prevention of the introduction of Ebola disease into Madagascar

Having regard to the decisions of the Council of Ministers of 04 August 2026 relating to the strengthening of health measures at the borders;

As part of the efforts to prevent the introduction of Ebola virus disease into Madagascar, the following measures are being implemented:

1. All travelers entering Madagascar must complete the Health Declaration Form, declare any stay or transit in an affected country during the last 21 days, and submit to health checks upon arrival:
 - document control (routine control);
 - temperature control;
 - health risk assessment;
 - Clinical evaluation if necessary.
2. Anyone showing suspicious signs will be immediately referred to the appropriate services and cared for in accordance with national protocols.
3. Entry into the territory is temporarily prohibited for foreign nationals who have stayed or transited in the last 21 days in countries affected by Ebola (depending on the epidemiological situation).
4. Malagasy nationals, foreign nationals residing in the country, holding a valid work or student visa, as well as any persons authorized those entering the country from these countries are subject to a mandatory 21-day quarantine with health monitoring, in accordance with applicable procedures. This provision also applies to diplomats and expatriate staff members of international organizations and NGOs.

All costs related to the quarantine stay, including accommodation, meals and necessary transfers to the quarantine site, are the responsibility of the person concerned.

The quarantine stay takes place in a site previously designated or in any other location authorized and secured by the competent authorities.

People placed in quarantine are required to strictly follow the instructions of the health authorities, in accordance with the procedures in force.

Each person placed in quarantine is issued an official certificate marking the beginning and end of quarantine.

The issuance of these documents, as well as any other necessary administrative documents, falls under the exclusive jurisdiction of the health authorities (COUSP – DRS/SDSP).

The documents thus issued are authentic and produce their effects with regard to all.

5. All travel to countries affected by Ebola is temporarily suspended.
6. Airlines and shipping companies are required to provide, before landing or docking, a complete list of passengers and crew members to the Border Police and border health control authorities. They are also responsible for informing travelers about applicable health measures and distributing Health Declaration Forms, which will be progressively replaced by a digital health declaration system once it is operational.

Any violation of these provisions or any false statement exposes its author to the penalties provided for by the laws in force.

Employers are required to recognize medical certificates issued by the competent health authorities and to facilitate the reintegration of employees who have completed their regulatory quarantine period.

The various actors and officials at the level of the points of entry, isolation sites, regions and districts as well as all relevant services are responsible, each within their respective area of responsibility, for the execution of this note.

These measures take effect from the date of signature and remain applicable until further notice.
